[Non-Traditional Machining Processes Pk Mishra Pdf Free](#)

Input and output parameters in AJM	
Process parameters	Output responses
1. Abrasive particles —its shape, size, strength, material and flow rate.	1. Material Removal Rate (MRR).
2. Carrier gas —its nature, composition, flow rate, pressure and temperature.	2. Surface roughness and accuracy of machined feature.
3. Abrasive jet —mixing ratio, striking velocity, impingement angle and stand-off distance.	3. Nozzle life or nozzle wear rate.
4. Nozzle —its profile and inner diameter.	
5. Work material —its mechanical properties and stress concentration.
